

- Brief description of the Garden, including any significant genus collections:

- Brief description of the garden maintenance and its frequency:

With this application the American Conifer Society requires:

1. A sample, photo or drawing of signage to be used to identify conifers
2. A history of the garden and particularly the conifer collection. This information will be included on the ACS website in the section 'Reference Gardens'. Please include a few choice photos of your conifer collection.
3. A picture/drawing of the holder for ACS literature and a description of where the holders will be located;
4. A physical review of the grounds, signage and conifer collection by the ACS Sponsoring Member and their signature and date in the space below (or a separate email from each sponsor is acceptable).
5. An inventory list of the conifer collection (or at least a partial listing to satisfy the requirement of 8 genera and 30 specimens).

For the ACS Member Sponsors of the Garden:

We have visited this Garden, seen the condition of the grounds and the conifer collection and believe that this garden is a candidate for the ACS Reference Garden Program.
